HTML Beginner to Advance Episode #07

HTML Link

Links are found in nearly all web pages. Links allow users to click their way from page to page.

HTML Links – Hyperlinks:

- HTML links are hyperlinks.
- You can click on a link and jump to another document.
- When you move the mouse over a link, the mouse arrow will turn into a little hand.

Syntax:

```
<a href="url"> content </a>
```

Note: A link does not have only text. A link can be an image or any other HTML element!
